

Salaheddine CHIKHI

Junior Data Scientist & Analyst

Casablanca, Morocco | +212713128958 | Salaheddine CHIKHI | [Linkedin](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Second-year IT student and ALX-certified Data Scientist combining software engineering rigor with advanced analytics. Skilled in **Python (Pandas, Scikit-Learn)**, **SQL**, and **C**, I leverage a deep understanding of system architecture to build optimized predictive models. A proactive leader, I directed the interface development for a digital platform as a freshman, demonstrating a strong commitment to impactful, user-centric solutions.

SKILLS

Data Science: Python (Pandas, NumPy), SQL (Joins, Window Functions)

Machine Learning: Scikit-Learn, Linear & Logistic Regression, Decision Trees, K-Means Clustering, Hypothesis Testing.

Data Visualization: Power BI (DAX, Dashboards), Matplotlib, Seaborn.

Engineering & Optimization: C (Memory Management), Linux/Bash Scripting, Git/GitHub, VS Code.

PROJECTS

Customer Analytics: Preparing Data for Modeling

DataCamp Portfolio

Python, Pandas, NumPy

- Simulated a real-world data pipeline by cleaning and transforming raw customer data to prepare it for predictive modeling.
- Handled missing values and performed feature engineering to convert categorical data into machine-readable numerical formats.
- Created a consistent dataset structure, ensuring high data quality for downstream machine learning algorithms.

Exploring Airbnb Market Trends

DataCamp Portfolio

Python, Data Analysis, Matplotlib

- Conducted an exploratory data analysis on Airbnb listings to identify key trends in price, popularity, and location.
- Cleaned and manipulated the dataset using **Pandas** to remove outliers and correct data inconsistencies.
- Visualized price distributions and location-based trends to provide actionable insights into the short-term rental market.

Analyzing Students' Mental Health

DataCamp Portfolio

SQL, PostgreSQL, Data Aggregation

- Utilized complex **SQL** queries (JOINS, GROUP BY) to analyze the impact of length of stay on the mental health scores of international students.
- Filtered and aggregated data to uncover correlations between social connectedness and depression/anxiety levels.
- Presented statistical summaries to highlight the importance of acculturation for student well-being.

LEADERSHIP & ENTREPRENEURSHIP

Founder & Tech Lead | AVYR DIGITAL

Jan 2026 – Present

- Founded a digital agency focused on web solutions, utilizing data-driven strategies to define the "Cyber-Luxury" market niche.
- Managed project timelines and client requirements, demonstrating strong leadership and the ability to translate technical concepts for business stakeholders.

EDUCATION

Hassan II University

Sept 2024 – Present

Casablanca, Morocco

IT Development (2nd Year Student)

- **Relevant Coursework:** Probability & Statistics, Linear Algebra, Relational Databases (SQL), Linux Architecture, C Programming.

ALX Africa | Remote

Jan 2025 – Feb 2026

Data Science Specialization (Candidate)

- Completed an intensive 13-month career-readiness program specializing in Python, Data Visualization, and Machine Learning.

DataCamp | *Online*

Associate Data Scientist Certification | *Completed*

- **Current Status:** Enrolled in Professional Data Scientist Track.
